<p>Cued Articulation Coming soon.</p> <p>What is Cued Articulation? <i>The idea of CA is to simplify what is very difficult to some people ie the organization and pronunciation of spoken English.</i> <i>All of the 49 sounds, or phonemes, which make up the English phonological system have a separate hand sign which is related to where and how in the mouth the sounds are made. The consonant sounds are colour coded for written work which helps decipher words with tricky spelling. The cues are based on linguistic theory and are logical and easy and fun to learn. CA is not a sign language where whole words and finger spelling are used, nor should it be confused with Cued Speech which is a totally different scheme used specifically with the severely hearing impaired. The scheme was originally devised to help speech and language handicapped children to see a sound and hear a letter by the use of easy and logical hand cues, but is also extremely valuable in ESL.</i></p> <p>The Cued Articulation system has proven to be an invaluable teaching tool. This series covers consonants, vowels and demonstrative images and has full colour coding throughout. Its potential and practicality is widespread and utilized by speech pathologists, speech and language therapists, remedial and reading recovery teachers who find the approach helpful in showing phoneme-grapheme relationships and teachers who use it in the classroom to teach the sounds of speech.</p> <p>Teachers who teach pronunciation to those who have <i>English as a second language</i> also find it extremely useful, as do teachers of the <i>hearing impaired</i> who want their students to see the sounds they cannot hear. Also available to compliment the book is an instructional, interactive DVD which includes demonstrations of the cues and sounds.</p> <p>Each of the 49 sounds which make up the English phonological system has a separate hand sign related to where and how, in the mouth, the sound is made. The signs are logical, based on sound linguistic theory. The consonant sounds are colour-coded as an extra visual cue when doing written work.</p> <p>Cued Articulation: Consonants and Vowels book \$34.95 Cued Articulation: Consonants and Vowels dvd \$69.96 Cued Articulation: Consonants and Vowels Loose Leaf. 154mm x 235mm x. <p>The Pronunciation of English</p> <p>This revised edition incorporates the <i>final results of Daniel Jones' lifelong study of English pronunciation usage</i>. It is the standard work on English phonetics. The Pronunciation of English was written originally as a detailed description of the phonetics of English, presented from the point of view of the native English-speaking student. Since the book provided key information needed by foreign students, it soon established itself as a standard textbook in universities where English was spoken as a foreign language. Most of the book is devoted to a descriptive account of English pronunciation. This is followed by illustrative texts in phonetic transcription of Received Pronunciation and several regional varieties, Scottish and American pronunciation and reconstructions of Shakespearian and Chaucerian speech.</p>	<p>\$76.95</p>
